Website Promise Audit Checklist for Agencies

Use this for each client site, once a quarter or whenever the client's business changes. Free from PromiseGuard: yarosim.github.io/promiseguard

1. Collect approved facts (from the client, in writing)

- ■ Business name and legal name
- ■ All phone numbers (main, tracking, after-hours)
- ■ Address(es) and service area
- ■ Hours, including seasonal or holiday hours
- ■ Prices or 'starting at' figures shown publicly
- ■ Booking / scheduling / contact form URLs
- ■ Current offers, with end dates
- ■ Claims made (licensed, insured, guarantees, response times)

2. Ask what's retired

- ■ Services no longer offered
- ■ Promises no longer made (e.g. '24/7', 'same-day', 'free estimates')
- ■ Old phone numbers, old booking tools, old locations
- ■ Expired offers and coupons

3. Check every page that carries a fact

- ■ Homepage, header and footer
- ■ Service pages and location pages
- ■ Landing pages and ad destinations
- ■ Contact and booking pages
- ■ Schema / structured data and meta descriptions (if used)

4. For each fact, record a result

- ■ Required text present? (PASS / REVIEW)
- ■ Retired text absent? (PASS / REVIEW)
- ■ Links go to the exact approved destination? (PASS / REVIEW)
- ■ Evidence: copy the exact text or link found

5. Close the loop

- ■ Confirm REVIEW items with the client before changing anything
- ■ Fix, then re-check

■ Log the approval date and next review date

A REVIEW result means a person should look. It is not proof a claim is wrong. This checklist is not legal advice.
